

MR6.5K-38

Portable Mid-Rise Frame Lift
6,500 lb. Capacity

Updated Design & Increased Capacity!!

The MR6.5K-38 is a portable 6,500 lb. hydraulic mid-rise scissor frame lift, equipped with twin hydraulic cylinders, pneumatic single point / double lock release system designed to lift cars & light trucks to a comfortable working height of 38". The lift comes standard with load bearing flip-up runway extensions, rubber spacer blocks, along with a power unit dolly, lift wheel kit & tow bar for convenient portability feature. The improved MR6.5K-38 lift now includes an additional weight capacity of 500 lbs. along with 'flat top' platforms as part of the improved design. The improved MR6.5K-38 is built for years of trouble-free service for brake work, wheel service, inspections & detailing applications.

Specifications

Lift Model	MR6.5K-38
