EP56-8 Lube Dispensing Bar

8-Outlet Lube Gun Console

A Durable, Lightweight Solution for Fluid Dispensing.

Designed for efficiency and durability, the **EP56-8** lube dispensing bar combines **lightweight black plastic sides** with **rugged stainless steel end panels** for a sleek, high-performance fluid dispensing solution. With its **parallel-to-bay mounting**, this **8-outlet** model allows product delivery from **either side**, making it an ideal choice for service centers looking to streamline operations while maintaining a clean, organized workspace.

The **EP56-8** offers a **lightweight yet durable** dispensing solution with superior functionality and adaptability, making it a reliable choice for modern service bays.

Features & Benefits

- **Hybrid Construction** – Tough black plastic sides paired with stainless steel ends for strength, durability, and corrosion resistance.
- **Compact & Efficient Design** – Optimized for two-vehicle service, maximizing space and workflow efficiency.
- **Universal Compatibility** – Molded dispensing meter saddle supports all major dispenser brands, including water bibs and air chucks.
- **Smooth Operation** – Self-lubricating composite hose guides ensure effortless dispensing from top and bottom.
- **Innovative Hose Management** – Through-ground hoses eliminate overhead drips, reducing mess and improving safety.
- **Cost-Effective Alternative** – Provides exceptional performance at less than half the cost of conventional overhead reel systems.

**Shown with lube gun accessories*
